Searles® Water Crystals are super absorbent with each crystal capable of holding hundreds of times its own weight with water. Plant roots penetrate the expanded water crystal and extract moisture as the plant requires. Whenever water is added, the crystals re-absorb and store the moisture. This absorption-release cycle of the crystals repeats continuously.

### DIRECTIONS FOR USE

1 HEAPED TEASPOON = APPROX. 4g WATER CRYSTALS

#### CONTAINER PLANTS

- Mix 1g Water Crystals to 1 Litre Potting Mix.
- Mix 8 Heaped tsps to a 30 litre Bag Potting Mix.

#### PLANTING PLANTS & SHRUBS

Mix 4 Heaped teaspoons Water Crystals into soil in planting hole prior to planting.

#### GARDEN BEDS

Sprinkle 75g (Approx. 18 heaped teaspoons) Water Crystals per sq. metre. Dig into top 10cm of soil prior to planting.

#### ESTABLISHING LAWNS & TURF

Sprinkle 75g (Approx. 18 heaped tsps) Water Crystals per sq. metre. Rake into top 5-10cm of soil prior to seeding or laying turf.
