

Sowing Instructions

1. May be sown all year round. Germination may be affected by cold or hot days and other weather impacts.

2. Prepare soil by cultivating or hoeing to a depth of 6-8mm.

3. Break down clods; remove large rocks, sticks and weeds.

4. Even soil until level, filling in hollows and flattening humps.

5. Ensure soil pH is correct. Ideally soil pH should be between 6-7. If acidic, add lime.

6. Apply Searles Penetraide® Re-Wetting Granules to promote moisture penetration, better and stronger growth.

7. Spread seed in two directions. Half in a north-south direction and half in an east-west direction. Ideally, use a seed sower for better results. Ensure sowing is even and not in patches.

8. Water with a fine spray and maintain soil moisture until grass has grown 8-10cm. Do not over or under water as this will affect germination.

9. Ensure area is free from traffic.

10. For long term healthy growth, fertilise through growing season with Searles® Robust® Lawn Booster Controlled Release Fertiliser.

Searles® Economy Lawn Seed

LOW MAINTENANCE

Maintenance

- If uneven establishment occurs, cultivate bare patches and apply more original lawn seed.
- Regular applications of Searles Robust® Lawn Booster will ensure a healthy lawn.
- First mowing should be done at 10cm average grass height. Do not remove more than 1/3 of grass height at any one time. Grass should not be shorter than 4cm deep.

Analysis

85% Minimum Germination Rate

55% Perennial Ryegrass
36% Annual Ryegrass
6% Turf Type Fescue
3% Unhulled Couch

NOT FOR PET/HUMAN CONSUMPTION

SOW BEFORE

Store in a cool dry place away from direct sunlight. Any unused seed can be stored in a closed container.

All Year Sowing

Searles® Economy Lawn Seed

Searles Economy Lawn Seed is a hard wearing, low maintenance blend of grass varieties.

This blend contains high quality rye grasses to provide fast germination of a cover grass to assist development of longer lasting couch & fescue turf.

Once established, this grass blend produces a picturesque lawn of deep green colour.

NOTE: Lawn image on the front of the carton is for packaging design only and may not represent the seed blend contained within.

Germination and lawn performance will vary due to many factors. All Searles lawn seeds are tested to an industry standard of minimum germination rate of 85%. Environmental factors such as climate and weather, soil types and general application and fertilising processes may vary its performance.
