Searles®
**SNAIL
& SLUG
PELLETS**

For the control of
snails and slugs
in home gardens

HOW TO USE

DO NOT PLACE PELLETS IN HEAPS

Treats 100sqm of precious garden.

Scatter pellets thinly over the soil, around plants wherever snails and slugs are to be found. Apply pellets 10cm apart (or at the rate of 5g per square metre). For the best results apply on a warm, moist evening, after rain or after garden watering when snails and slugs are most likely to attack your precious plants and vegetables.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED.

Taste deterrent discourages children. These pellets contain the most bitter substance known to man, to act as a taste deterrent to discourage consumption by children and to a lesser extent, pets.

Smaller, harder pellets. Searles snail and slug pellets are not only smaller, but spread further and are more difficult for pets to pick up from the garden.

CAUTION

Keep away from animals. Pets may find this bait attractive to eat, and if consumed the pellets may kill them. If pets are poisoned, contact a veterinary surgeon and inform them that your pet has consumed the green snail and slug pellets. DO NOT allow chemical containers or product to get into drains, sewers, streams or ponds.

SAFETY DIRECTIONS

Poisonous if swallowed. Wash hands after use.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.
